

Coraline got invited to hangout with some friends tonight!

It's already dark outside, though. It's dangerous for her to walk or carpool there.

Thankfully, her friend, Alexa, told her about an app called Uber4Women<3.

With this app, she can safely ride to her destination with a woman driver!

She had a great time with friends and is glad she could go!

Uber4Women<3 is an app that's changing the Lyft game!
